Dealing with terrorism, ISIS & threats in a complex environment

July 19, 2016

Pavilions 13-14 // Exhibition Center, Tel Aviv

The 2nd Annual International Conference on Intelligence and Special Forces is the only conference of its kind in the world, detailing the work of intelligence and Special Forces units in an era of military and terrorist threats that are growing in both sophistication and danger.

The conference was initiated by Israel Defense and the Israel Intelligence Heritage & Commemoration Center (IICC), the official association of veterans of military intelligence, the ISA, Mossad and many others.

Be sure to take part in a conference of senior officials from Israel and around the world; alongside intelligence officials, experts, academics, industry leaders and innovative companies.

IT&SF will consist of a unique exhibition displaying state-of-the-art technologies from prominent Israeli and international companies.

The IT&SF Conference will discuss the challenges of intelligence, regional chaos, Syria and the growing danger posed to Europe and the Middle East, cyber threats, immigration and terrorism, global jihad, new & emerging alliances, counter-terrorism, Special Forces and more!

The event will be held in collaboration with leading Israeli industries who are proud to display their latest technologies and discuss the current challenges in the field of intelligence.

The conference will create a fertile ground for thinking and an open & creative discussion on strategic issues relating to the military and commercial fields. IT&SF will raise awareness among policy-makers, decision-makers and heads of defense industries on intelligence to the threats we face, while promoting and developing business partnerships for militaries and civilians.

Conference participants will be comprised of senior figures from the defense establishment and industry, decision makers, international military personnel, head of field intelligence units, foreign officials, professional delegations from abroad, project managers from the defense industry, Special Forces, elite intelligence units, academics, entrepreneurs and investors.

Alongside the conference, a unique exhibition will be held on Intelligence Technologies & Special Forces Units
